

December 1, 2008

Over the past months, there have been a lot of questions raised about subjects in Johnny's case which had been established long ago. The Foundation thru my postings have honestly answered questions for people as to the chronological time frame that events took place. It resulted in just/only several people verbally attacking every word I typed. Attacking not only the information but also Noreen as a person for nearly every decision she has ever made about this case...This sort of behavior is totally out of line.

There are some things you should ponder:

1. Where were the kidz kept between "gigs". The times the kids were used to "entertain" clients. They had to be somewhere.
2. Who were the care takers of the kidz? When they got sick...were doctors called? If they needed a dentist...what then?
3. Consider the dates of when Bonacci had contact with Johnny and then a few years later when Jimmy made contact. (There in lies a lot of the answers as to why some reporting differs. Both young men are correct.)
4. Bonacci was sent to prison...Wadman made sure he was taken out of the public eye. Just as they did with Alishia Owen .... their crime... "telling the truth". He was there for five years. A lot went on with Johnny during those years after Bonacci's initial contact with him.
5. Why indeed did the WDMPD begin the cover up which has lasted to this date?
6. Why the death threats to a mother who was trying to find her child? These death threats began within two weeks of the kidnapping, when she asked questions.
7. Were there heavy hitters involved in this kidnapping as well as the other two boys in Des Moines? Thus the death threats?

These are only a few question that if people really thought about them they would be able to figure out what we already know. The years of investigation have paid off for the Gosch Foundation. Many investigators from all over the country have joined forces to work on aspects of the case where ever it takes place. Not all the leads are within the Des Moines City limits.

Again, we have tried to share information which could be helpful but have been subjected to countless barbs, critics and discrediting efforts. Each time the people involved say "they are just asking questions". However, when the answers are given it becomes new fodder for them to attack. The chronological order of the way events took place is the key on this case.

As for the WDMPD, comments have been made that the relationship with them and Noreen isn't good. No and it never will be because they cannot be trusted, they have destroyed evidence, not investigated crucial evidence, threatened witnesses. There is absolutely no reason to work with them or to trust them.

My point in writing this it to once again mention that an effort was made to honestly answer legitimate questions from people however it didn't work with some. They like to fight and you know who you are. So we have made a decision, there will be no further information given by the investigators on this forum. You can chew just on what is already out. Sharing any more is counter productive to the investigation and to this forum, which was started to discuss the Franklin Cover UP and Johnny's Case, not to try to discredit and destroy them.
